

Pharma360 Power BI Dashboard Portfolio

Overview: Pharma360 is a comprehensive **Power BI analytics solution** designed for pharmaceutical supply chain, finance, and inventory management across Germany. It integrates data from multiple sources to deliver actionable insights for executives, logistics teams, and financial analysts.

1. Revenue & Supply Chain Overview

- Tracks total revenue (€2.85 bn), quantity (13 M), and orders (5 K).
- Highlights payment status, delivery performance, and compliance rates.
- Visualizes monthly revenue and order trends for strategic forecasting.

2. Executive Dashboard

- Summarizes hospital-wise orders and revenue distribution.
- Displays payment status and manufacturer performance.
- Includes a geographic map of major German cities for regional insights.

🚚 3. Delivery & Logistics Dashboard

- Analyzes delivery rates by logistics companies and warehouses.
- Shows delay rates, average delivery days, and regression visuals.
- Helps identify bottlenecks and optimize delivery efficiency.

💰 4. Financial Analysis Dashboard

- Compares total and risk revenue across product categories and hospitals.
- Tracks monthly revenue trends and discount patterns.

- Supports financial risk assessment and profitability analysis.

5. Inventory & Stock Dashboard

- Monitors stock levels, reorder points, and warehouse performance.
- Displays manufacturer lead times and cold-chain compliance (58.2%).
- Visualizes temperature-zone orders for quality control.
